

YOUNGSTER FUNKY FIGHTIN' **REPTILES**

Playtest 2026-06-02

The Mean Machines – Part 1 – Instructions

Dudes! The YFFR need to get into their hideout, but Dicer’s minions have seemingly locked the door with a combination lock controlled by four heavy discs and three poles.

We can hear Mentor Zeno’s voice from inside: “These discs are heavy and can only be moved by your Funky strength, Reptiles! The topmost disc can be moved to any other pole, but only if that pole does not already contain a smaller disc. To unlock the door, you’ll need to move the entire tower of discs into a different pole using as few moves as possible!”

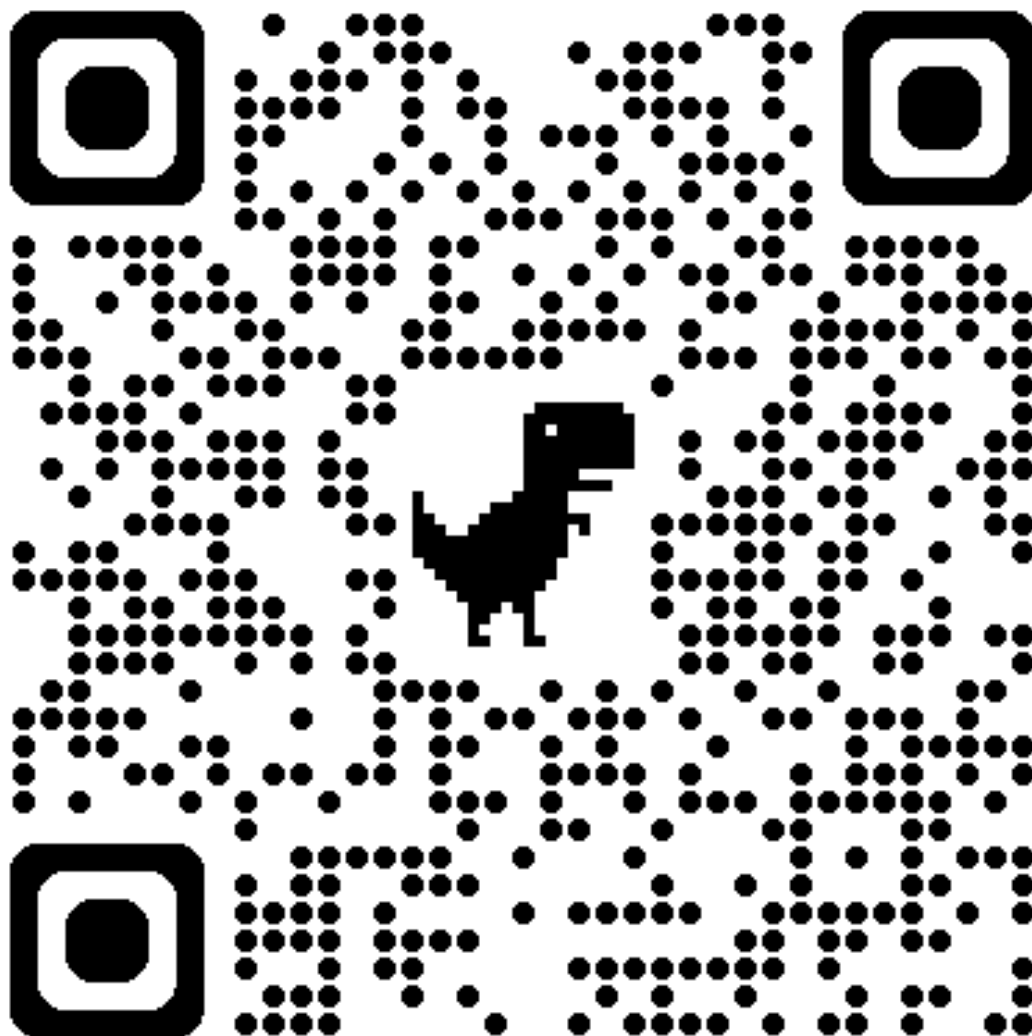

Mirzakhani quips, “Hey look here, Rep-dudes! It looks like we can assign a letter to each disc! And when we move the disc, it changes to the next letter of the alphabet: A to B, B to C, and so on, ending with Y to Z, and Z to A!”

The voice of Mentor Zeno comes through one more time. “Reptiles, look around. Do you see a clue that tells you which letters to choose before moving the discs?” Sure enough, you see these letters scrawled onto a nearby wall:

z A P A

The Mean Machines – Part 2 – Instructions

Radical! Our heroes pass the first door, but only to be stymied at another. Mentor Zeno's voice echos through: "You can do this, Reptiles! But be wary: this second lock has five discs, and you are not allowed to move a disc directly from the leftmost to the rightmost slot. How can we get the tower of five discs moved into the center slot using as few moves as possible?"

Another clue is scrawled on a nearby wall:

Move 38: 2N 5N / 3F 4G / 1X

The Mean Machines – Part 3 – Instructions

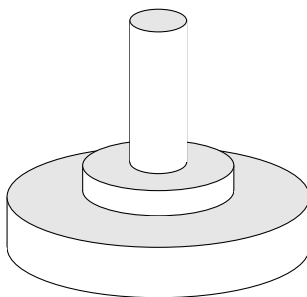

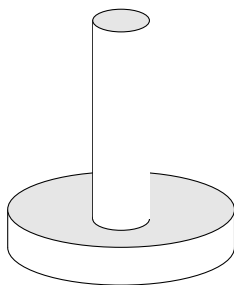

Booyah! Our heroes have made it back into the Funky Fightin' Reptiles refuge! Mentor Zeno claps them all on the back. "You have done well, young tetrapods. But I have to admit, this was all just a test to see if you were truly ready to defeat the evil Dicer and his Knee Club."

Zeno points to several towers. "Time is short and you must get back to the fight. However, if you do have a moment, I have a final puzzle for you to ponder over. Have the lessons you've learned so far given you the ability to figure out the meaning of my secret code?"

The Mean Machines – Part 3

20,000 Leaks Under the City – Part 1 – Instructions

Total drag! The Knee Club has messed with all the City's sewage drainage pipes, and if our Reptiles can't fix things quick, it'll be a real stinker of a situation!

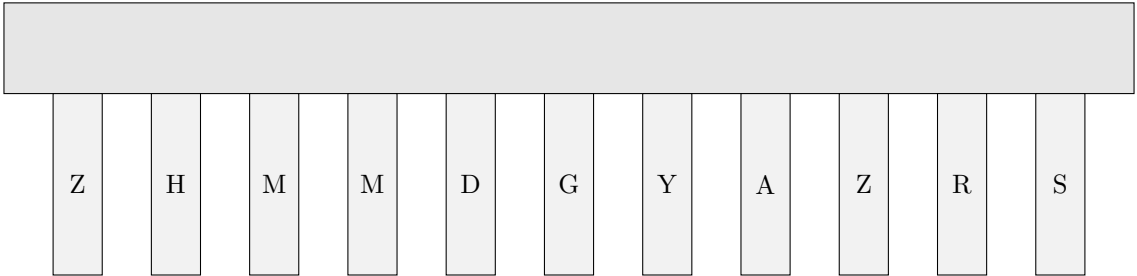

To fix each set of pipes, pairs of pipe outlets must be connected by non-overlapping U-bend connectors, leaving exactly 1 pipe outlet unconnected and without any U-bend crossing under it. Here are two valid examples and two invalid examples:

There are exactly 80 different sets of pipes across the City, and due to municipal regulations, each set must be connected up differently than every other set. (Good thing there aren't any more: there's exactly 80 different ways this can possibly be done!)

To help the Reptiles out, you first should determine which six of the eleven pipes could possibly be left unconnected according to those rules. Next, calculate for each the number of different ways the other ten pipes can be connected together. Finally, use that number to shift the letter found on its pipe (for example, C shifted by 4 is G, X shifted by 7 is E, etc.) to reveal a six-letter secret codeword.

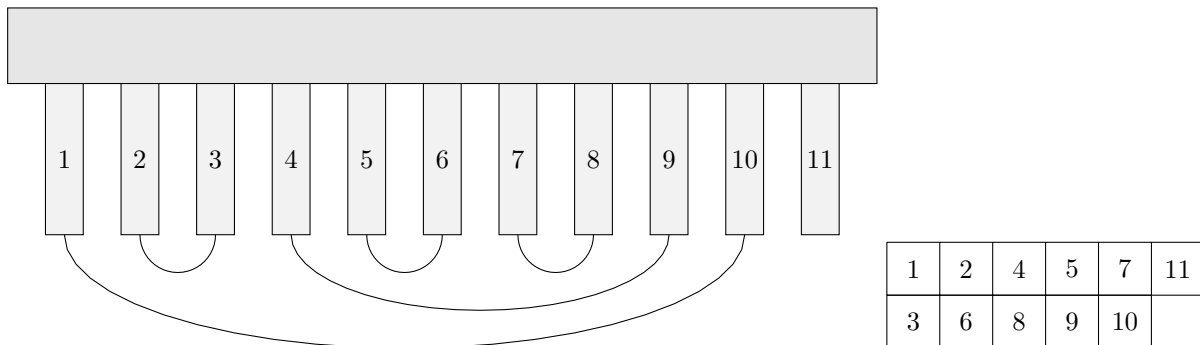

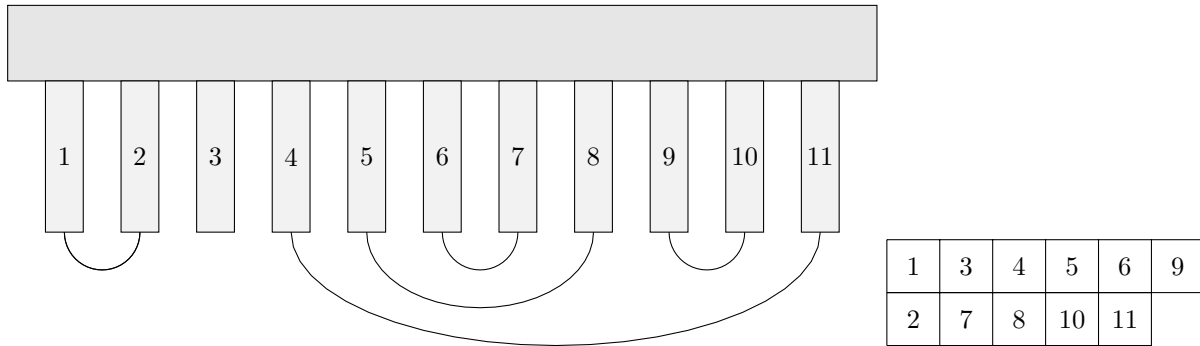

20,000 Leaks Under the City – Part 1

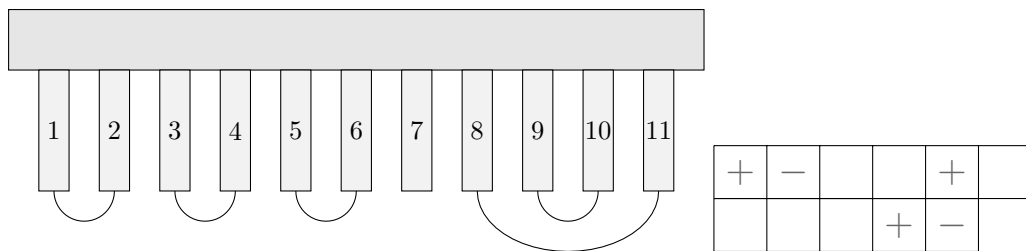

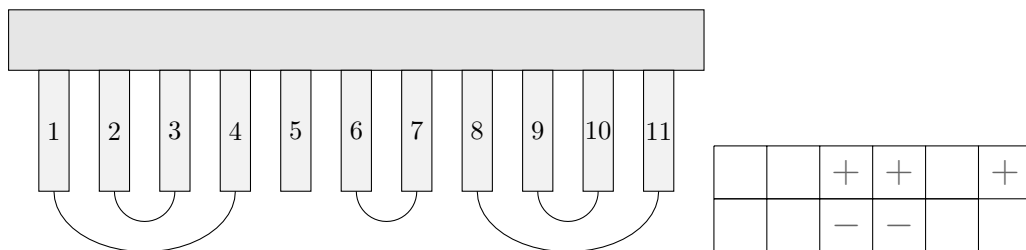

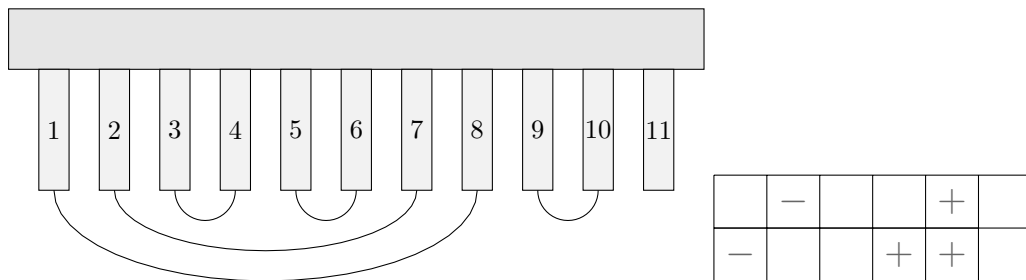

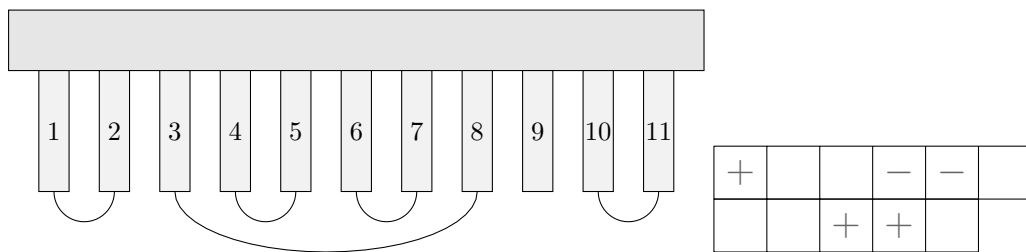

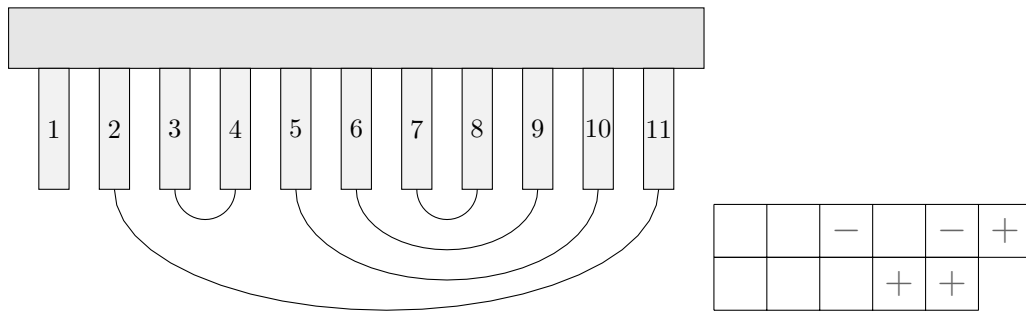

20,000 Leaks Under the City – Part 2 – Instructions

Rockin'! Keeping up with these 80 different pipe configurations is a bit of a pain though, so it seems the Ankle Crew has come up with a coding system to keep track of each possible setup.

For a given configuration, the numbers 1 through 11 must be inserted into a tableau of eleven squares according to certain rules. Based on these two examples, can you figure out what those rules must be? If so, you should be able to complete the five tableaux in your puzzle booklet, each of which reveals a letter of the next secret codeword...

20,000 Leaks Under the City – Part 2

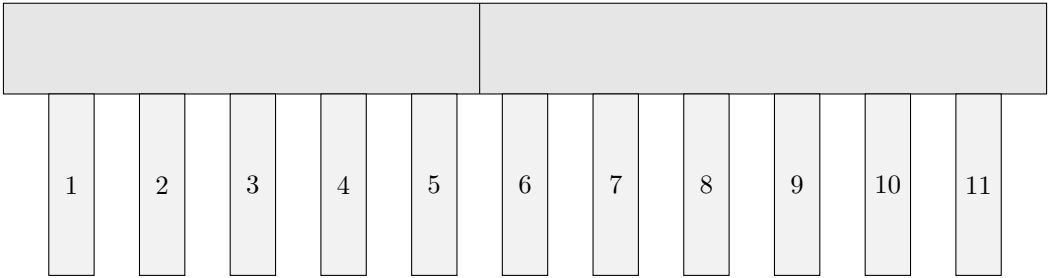

20,000 Leaks Under the City – Part 3 – Instructions

Gnarly! With the City's sewer drains all patched up, our Reptiles can put their focus back on taking down the Ankle Crew. Speaking of which, how could they possibly be funding their operations? Mentor Zeno always says to follow the money...

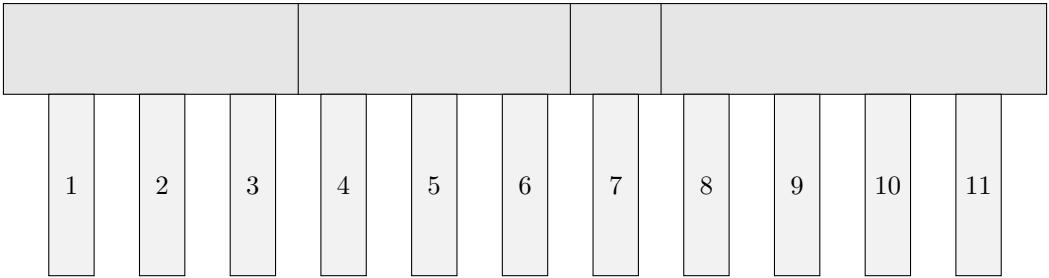

Perhaps the key to figuring out the source is by inspecting the final two tableaux in your puzzle book, along with their two specially marked pipe sets. They seem to be telegraphing something...

It Came From Beneath the Sewers – Part 1 – Instructions

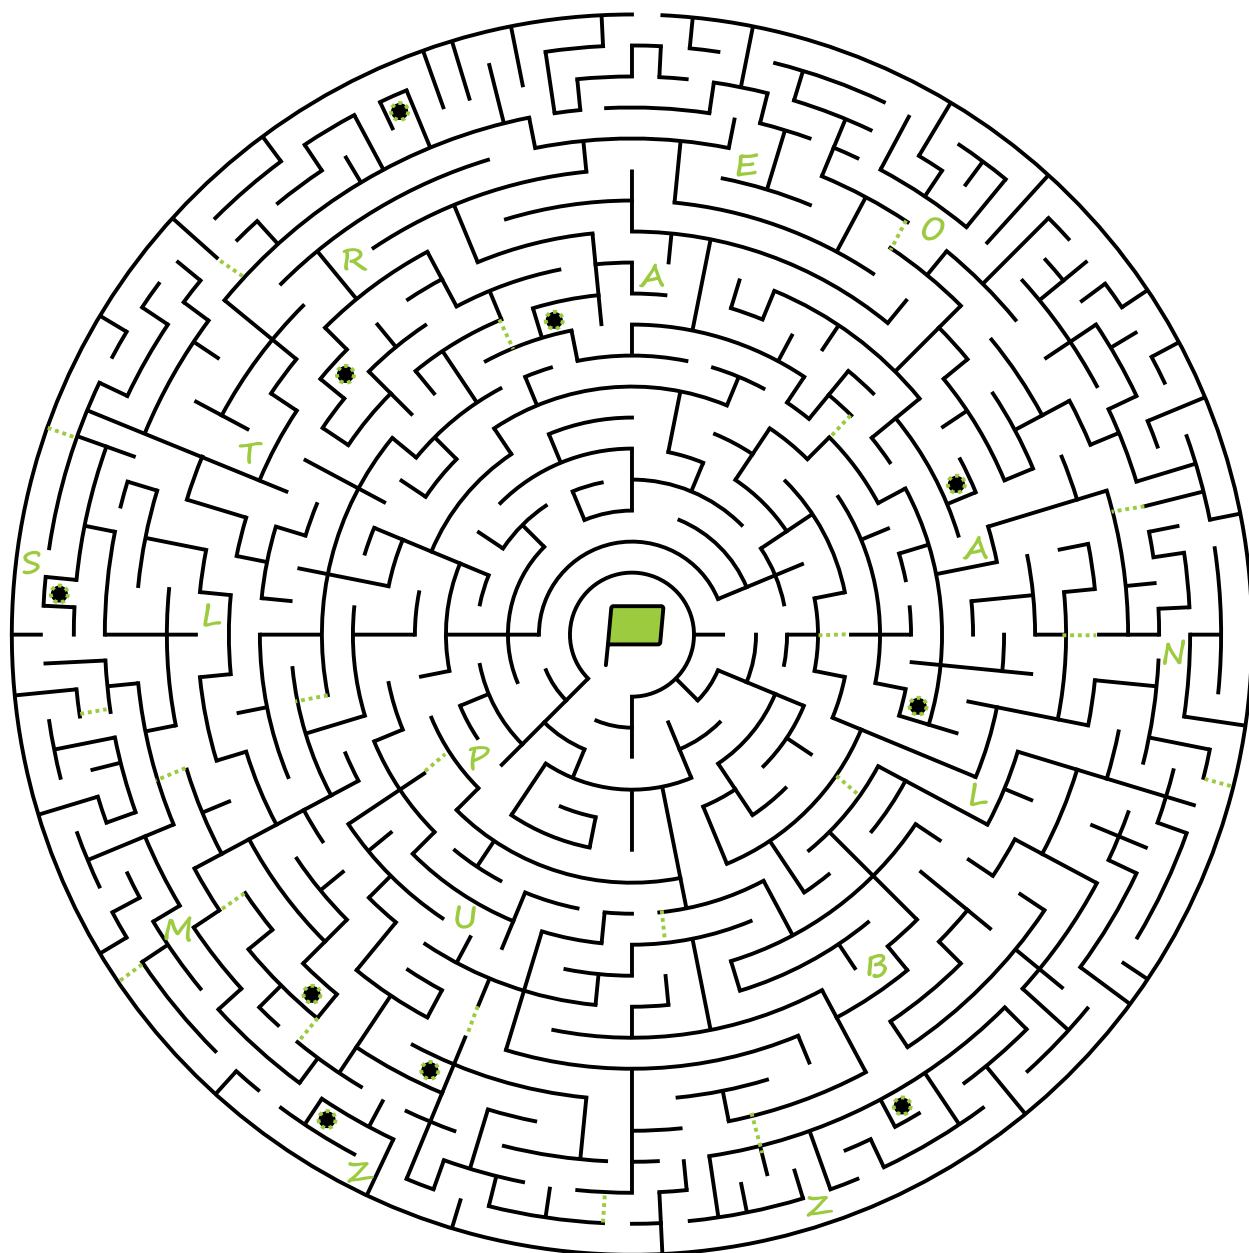

Cowabunga! It looks like Dicer has hidden a secret codeword in the city sewers! And, bummer dude, it looks like several of the pathways have been obstructed by concrete barriers (dashed lines). Luckily, our Reptiles have stashed several explosives (discs with a dashed border) in the maze for just such a scenario.

You can cross a barrier, but you'll have to first pick up and use an explosive. Put another way, to pass the third barrier, you need to have picked up at least three explosives first.

Find the unique route that gets you from the entrance at the top of the sewer maze to the goal flag at the center. The letters you cross along the way should help reveal the secret codeword!

It Came From Beneath the Sewers – Part 1

It Came From Beneath the Sewers – Part 2 – Instructions

Alright! Our radical band of reptilian heroes made it through that first sewer, but it seems the Ankle Clan hasn't ended its mischief there. We've found six more sewers that need to be explored.

BUT, the goal is a little different this time. It's not enough to merely to make it to the center of the maze. Instead, the Reptiles must clear out all the barriers using all the explosives. It's possible to do this for all six, but for some of them, it's possible to get stuck before clearing everything out!

Can be cleared... ...but can get stuck

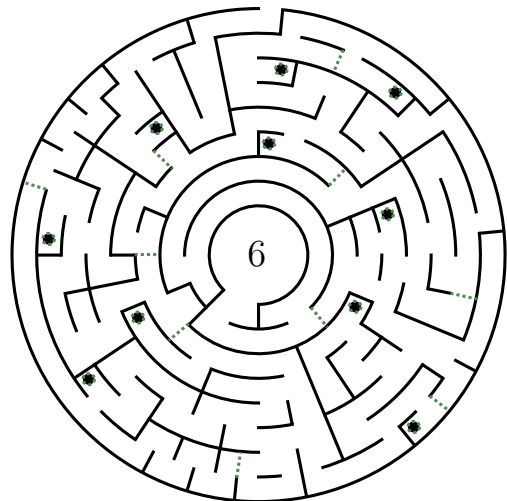

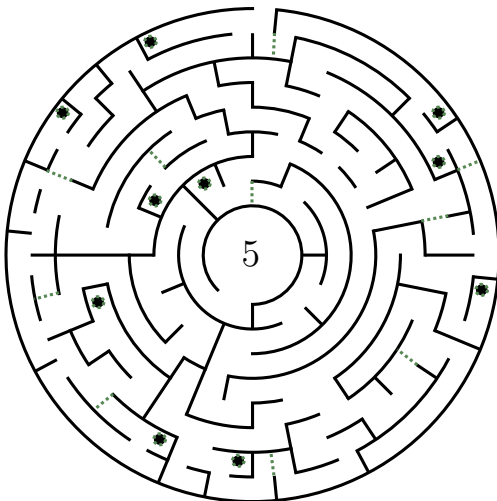

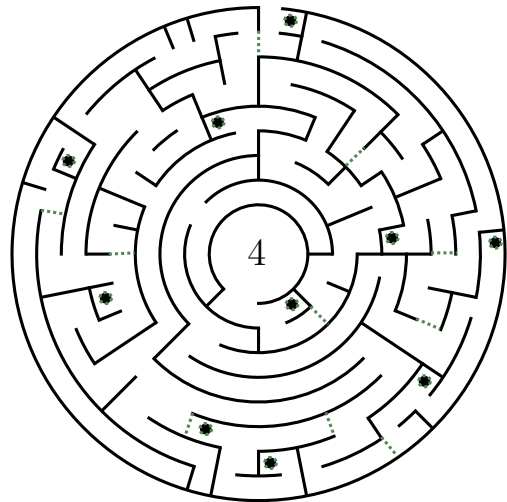

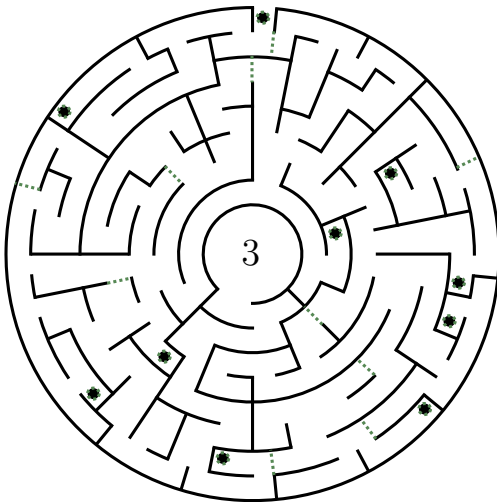

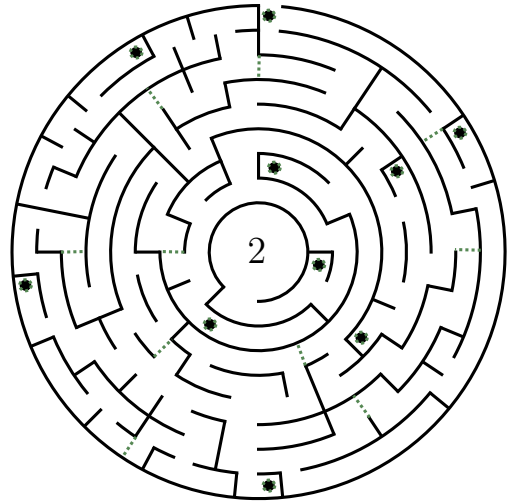

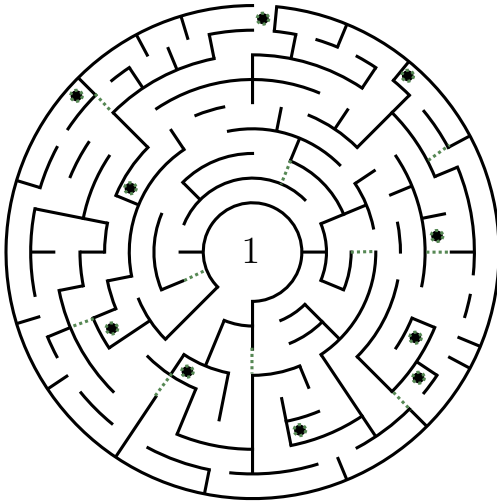

Can never get stuck!

Find which mazes you can get stuck in, and which mazes you can never get stuck in. That's the key to breaking the below Ankle Clan code, *sight unseen*.

② ③	② ①	④ ④	② ⑥	① ③
③ ⑥	⑤ ①	② ①	③ ①	④ ⑥
⑤ ⑤	④ ③	⑥ ③	⑥ ⑤	② ⑤

④ ⑤	① ⑥	⑥ ①	② ⑥

It Came From Beneath the Sewers – Part 2

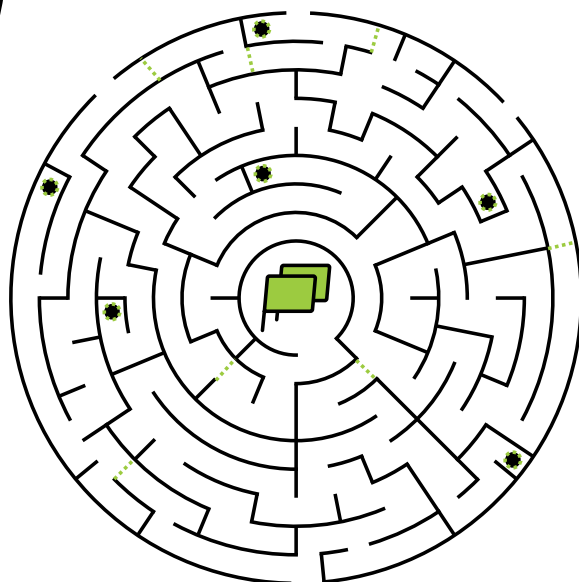

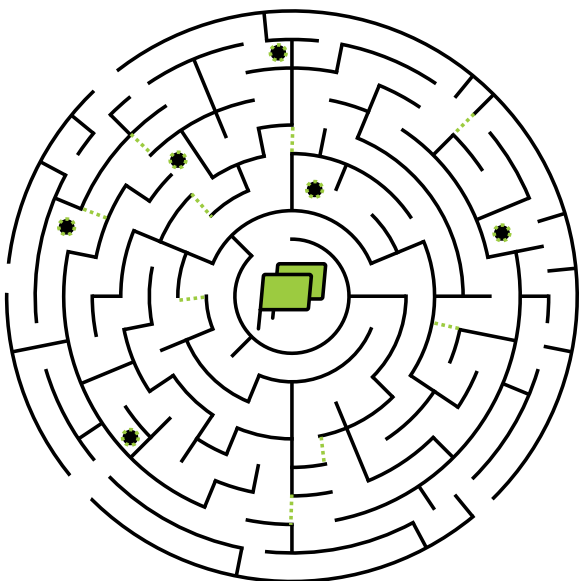

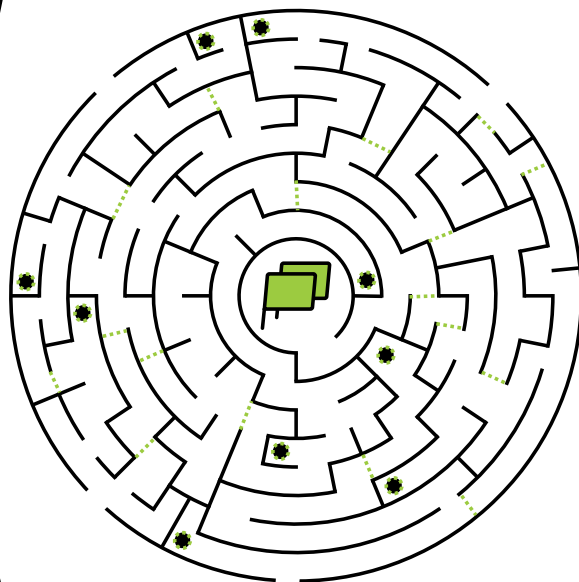

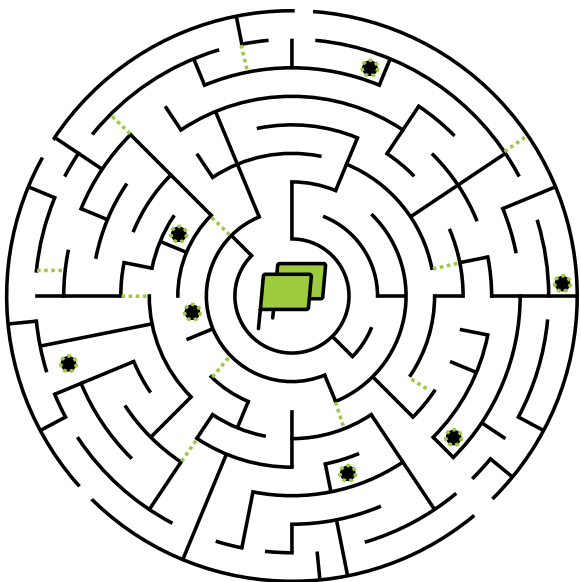

It Came From Beneath the Sewers – Part 3 – Instructions

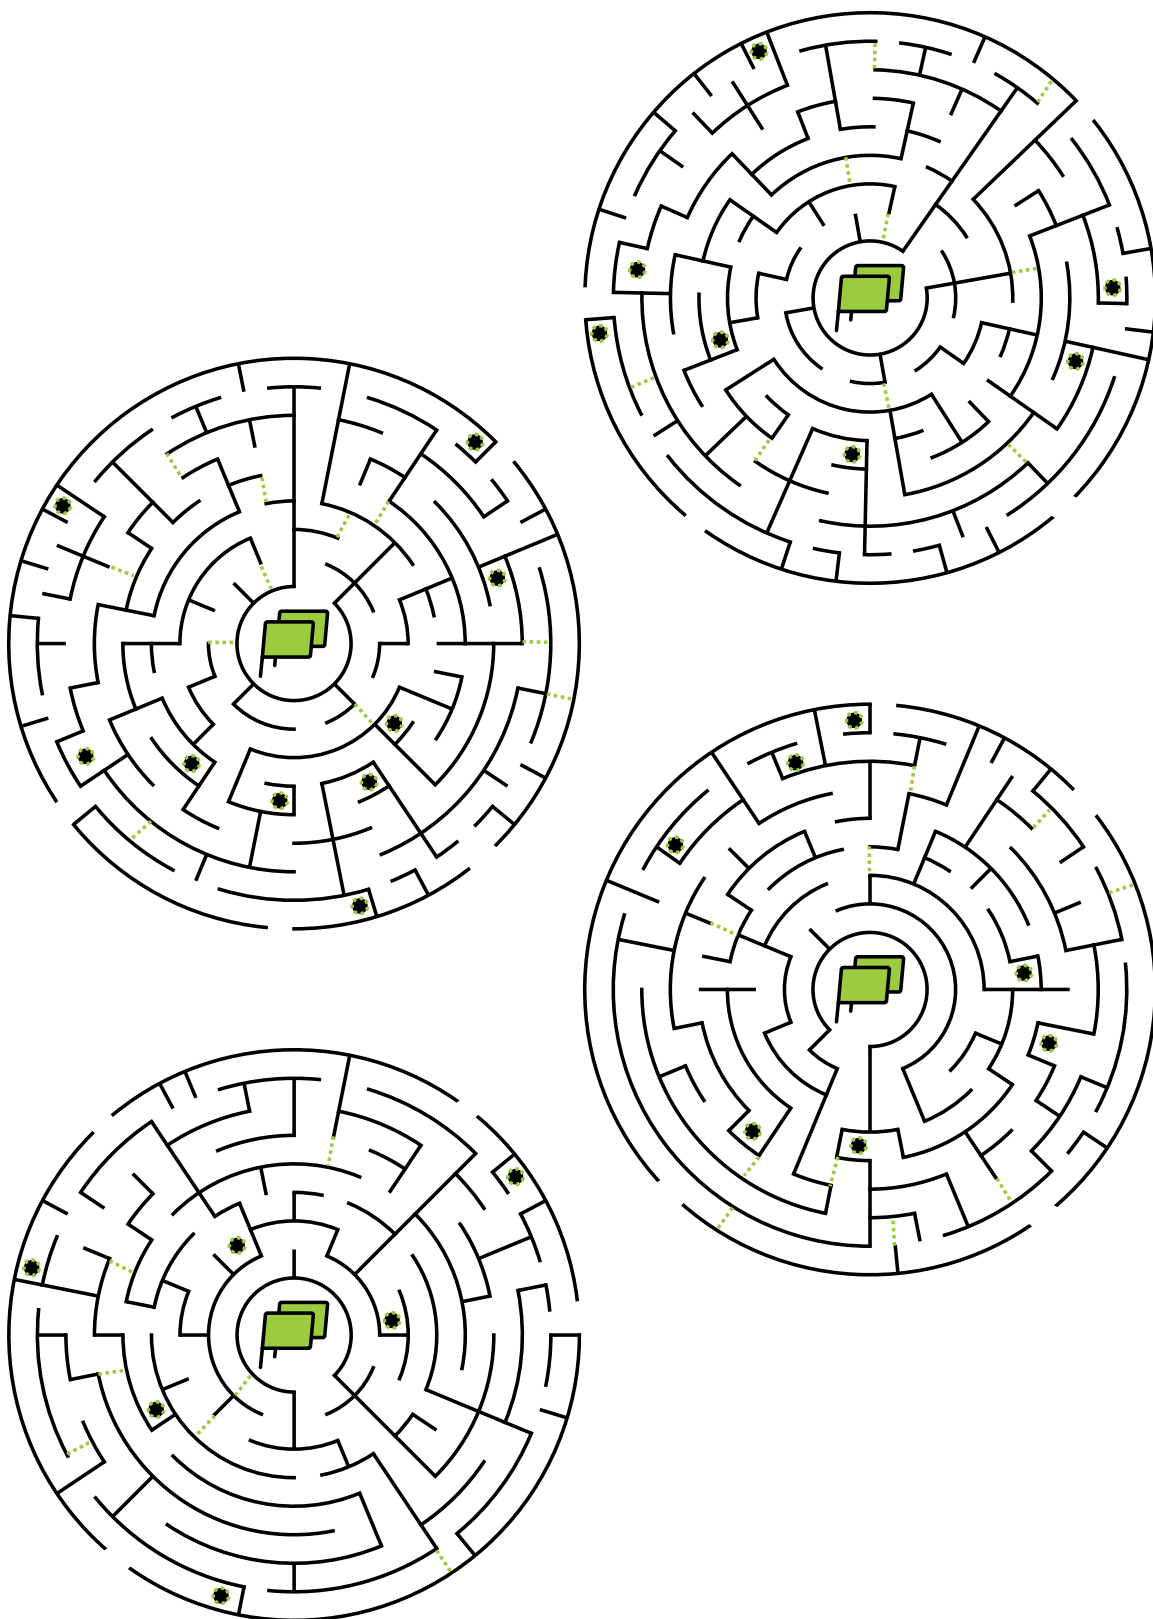

Tubular! Dicer's minions have been all but expelled from the city sewers, and our Scaly Rascallions have just eight more to handle.

For these last eight sewers, the goal again is to just reach the center. However, these sewers each have four entrances. Can you figure out which two entrances have paths that lead to the center, and which don't?

And hey, what's that in the center of each maze? Maybe it's a clue on how to use these mazes to decipher an eight-letter codeword...
